

Stephen Njoroge Mburu

Full-Stack Software Engineer • Mobile & Cloud • DevOps

| 0742542526 | njorogesteve4066@gmail.com | M.Sc. Computer Science (in progress)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 2+ years building production-grade web, mobile, and cloudnative systems. Fluent across the entire stack — Vue 3 / Nuxt 4 / React / Angular frontends; Laravel, Spring Boot (Kotlin), and Go backends; Flutter & Kotlin mobile apps; and Docker / Kubernetes / Helm DevOps pipelines.

Delivered real-world products spanning logistics, property management, agri-commerce, and corporate systems. Currently pursuing a M.Sc. in Computer Science while shipping software daily.

CORE TECHNICAL SKILLS

Frontend	Vue 3 (Composition API, Pinia, Vuex) • Nuxt 4 • React • Angular • TypeScript • Tailwind CSS • ShadCN UI • Vite • TanStack Table • VeeValidate • Zod
Backend	Laravel (Sanctum, Spatie, Excel) • Spring Boot / Kotlin • Go (Gin, JWT, Migrate) • Node.js • RESTful APIs • gRPC • Microservices • Event-Driven Architecture
Mobile	Flutter (Dart, Riverpod) • Kotlin • Java (Android) • MVVM / Clean Architecture • Retrofit • Room DB • RxJava • Jetpack Compose
Cloud & DevOps	Docker • Kubernetes • Helm • GitHub Actions • GitLab CI/CD • Jenkins • AWS • Terraform • Prometheus • Grafana • ELK Stack
Databases	PostgreSQL • MySQL • MongoDB • Redis • TimescaleDB • Flyway Migrations • Query Optimisation • Multi-tier Caching
Auth & Integrations	Keycloak (multi-tenant) • JWT • OAuth2 • M-Pesa Daraja • PesaPal • NCBA Bank (SOAP) • Aqara IoT (smart locks) • Google Maps
Blockchain / Web3	Smart Contracts • Solidity (learning) • Web3 integration • Quantum computing interest
Languages	PHP • Java • Kotlin • Dart • JavaScript / TypeScript • Go • Python • SQL • Rust (learning)
Practices	Clean Architecture • TDD • DDD • Agile/Scrum • Code Review • CI/CD • Mentorship • Technical Documentation

PROFESSIONAL EXPERIENCE

Senior Web Developer|| Co-Founder

Feb 2021 – Aug 2024

Frikam Digital Solution • Murang'a, Kenya

- Led migration from monolithic PHP app to 8 Go microservices — infrastructure costs cut 30%, horizontal scalability improved.
- Engineered APIs processing 5K req/s using Go with connection pooling and optimised middleware.
- Containerised full stack with Docker, Kubernetes, and Helm charts — deploy time reduced from 45 → 18 min.
- Revamped frontend with Vue 3 Composition API + React Hooks; Lighthouse score climbed 62 → 91.
- Achieved 85% test coverage (Go testing, Jest, Cypress) and 45% fewer production bugs.
- Delivered full-stack applications in Laravel, Spring Boot, and Go for fintech, e-commerce, and healthcare clients.
- Built RESTful microservices with OAuth2 auth, API versioning, and OpenAPI documentation.
- Created responsive SPAs in Vue.js / Nuxt with Pinia / Vuex state management and Vite build tooling.
- Optimised performance through code profiling, lazy loading, and CDN integration — initial load times cut 40%.
- Developed native Android applications in Kotlin & Java following Clean Architecture (MVVM) patterns.
- Integrated RESTful APIs with Retrofit + RxJava; built offline-first architecture using Room DB.
- Enhanced UI/UX following Material Design guidelines — Play Store rating improved from 3.8 → 4.5 stars.

FEATURED PROJECTS

Logistics Customer Mobile App — *Flutter • Dart • Riverpod 3 • Go Router*

- Cross-platform mobile app (Flutter + Riverpod 3) for the same logistics platform; covers online shopping, package tracking, door-to-door booking, and local delivery request flows.
- Clean architecture with annotation-driven code generation; modular feature structure.

AIMS — Enterprise Property Management System — *Spring Boot • Kotlin • Nuxt 4 • Angular • PostgreSQL • Flyway • Keycloak • M-Pesa • Docker*

- Enterprise property management system (migrated from Angular + Java to Spring Boot Kotlin + Nuxt 4) for a multi-operator short-stay accommodation platform.
- Multi-tenant architecture via Keycloak; payment integrations: M-Pesa Daraja (KES), PesaPal (USD/card), NCBA Bank (SOAP).
- IoT smart lock integration — OTP-based door unlock triggered on booking confirmation. Full booking, finance, inventory, and accounting modules.

Agri-Commerce & Farm Management Platform — *Laravel • Vue 3 • Nuxt 3 • ShadCN UI • Tailwind CSS*

Sanctum • Docker • Kubernetes • Helm • GitHub Actions

- Full-stack agricultural platform combining a product listing API (Laravel — advanced filtering, category trees, seller management) with a farm management dashboard featuring complex multi-step forms and conditional UI workflows.
- Vue 3 Composition API + TypeScript frontend with ShadCN + Tailwind; Laravel backend with Sanctum auth, Spatie packages, and Excel exports.
- Docker Compose for local dev; Kubernetes manifests and Helm charts for cloud-native production deployment; GitHub Actions CI/CD pipelines.

EDUCATION

B.Sc. Applied Computer Science (Honours)

2017 – 2021

Chuka University, Kenya

CERTIFICATIONS & CONTINUOUS LEARNING

- Teach2Give - Software Engineering
- Udemy - Ethical Hacking
- AWS Certified Cloud Practitioner — Amazon Web Services
- Meta React Software Engineering Professional Certificate — Meta / Coursera
